Is There A Natural Cancer Cure? I'm a Stage-4, 10-Year Survivor Because I Had Natural Treatments At A Mexican Cancer Clinic.

A Mexican cancer clinic saved my life in 2007 by using natural cancer treatments. Hi, I'm Peggy Sue Roberts, a 10-year, stage-4 cancer survivor. I live in Southern California and I'm very blessed to be alive today. I certainly wouldn't be here today if I took the medical advice of my conventional oncologist. He simply said oncology couldn't do anything else for me because of my near death reaction to chemotherapy . He sent me home to die in 2006.

Stage 4 Cancer Survivor Peggy Sue's Survival Story

**Video disclaimer: Results may vary.*

Instead of accepting his prognosis, my husband Jim and I had decided to try natural cancer treatments after some research. I arrived at the Mexican cancer clinic in a wheel chair with just several weeks to live. I was very weak, and felt like I was going to die. But I had the will to live! After several weeks of natural cancer treatments, I was a new person. I felt strong, and alive. My husband, Jim, and I walked out of that clinic with huge smiles on our faces. I knew I was going to live.

A few weeks after returning home from Mexico, I went to see my conventional oncologist. He was in mild shock after receiving the results of my “after” PET-scan test, compared with my first PET-scan.

He said, *"I've never seen anything like it in my life, Peggy. Your blood test is perfect, and your PET-scan didn't detect any cancer at all."* I never told him I had been to a Mexican clinic and he never asked, which I can only imagine was because he never really cared.

Now, after getting natural cancer treatments at a Mexican cancer clinic in 2007, I've enjoyed 10 additional years of life that's been given to me. I feel great today, and I thank the Lord for the additional time with my family.*

My Story On William Shatner's Moving America Forward

Cancer Survivor Peggy Sue On William Shatner's Moving America Forward ...

Natural Cancer Treatments I Used At The Clinic:

These are some of the top natural cancer treatments used to transform me from terminally ill to cancer survivor. Of the 16 or more therapies offered, here are six natural cancer treatments the clinic used for my treatment program:

- Hyperthermia(*local/whole body heat*)
- Sonodynamic Therapy
- IPT
- Oxygen Treatments
- Enzyme Therapy
- Halo (Biophotonic) Therapy

Several Survivors From The Same Clinic That I Went To:

John Russell received six weeks of natural treatment for Myeloma bone marrow cancer at the clinic. In June 2017, he was discharged from the clinic after a positive CT PET scan found no cancer activity.* Here's his personal testimonial below.*

“I was stage 4 before I got here.” - Michael*

Michael underwent two years of chemotherapy with no success. His gastroesophageal junction cancer had progressed to stage 4, and his options were running out. After a conversation with a former patient Michael was inspired to immediately make the trip to the clinic.

From his first day of, Michael began feeling better. He was impressed with the professionalism and attentiveness of the center’s staff. Michael’s tumors were extensive, but with an alternative cancer treatment plan, his cancer was no longer detectable.*

“You saved my life.” - Elaine*

Elaine arrived at a alternative cancer clinic in 2015, and she continues to share updates on her good health since returning home. We were so happy to receive this note:

“Good Morning Doctor, It is now one year ago that I first came to your center. I often think back on my time there... Thanks to you, and your staff, and God; I’ve come a long way. You saved my life, and we are very grateful.” -Elaine*

John thought he was having a heart attack. A CAT scan found he actually had a massive, malignant tumor on his thymus gland. He underwent conventional cancer treatment—chemotherapy and surgery—but his tumors continued to grow. John was told his body could not handle another round of chemotherapy, and he was given just months to live.

A doctor suggested he consider alternative cancer treatments. After several weeks of alternative treatment, his tumors—which had been so large and aggressive they had broken through his rib-cage—were gone. Today John is in remission.*
